

REPAIRS OF BALL AND TRAPEZOIDAL SCREWS

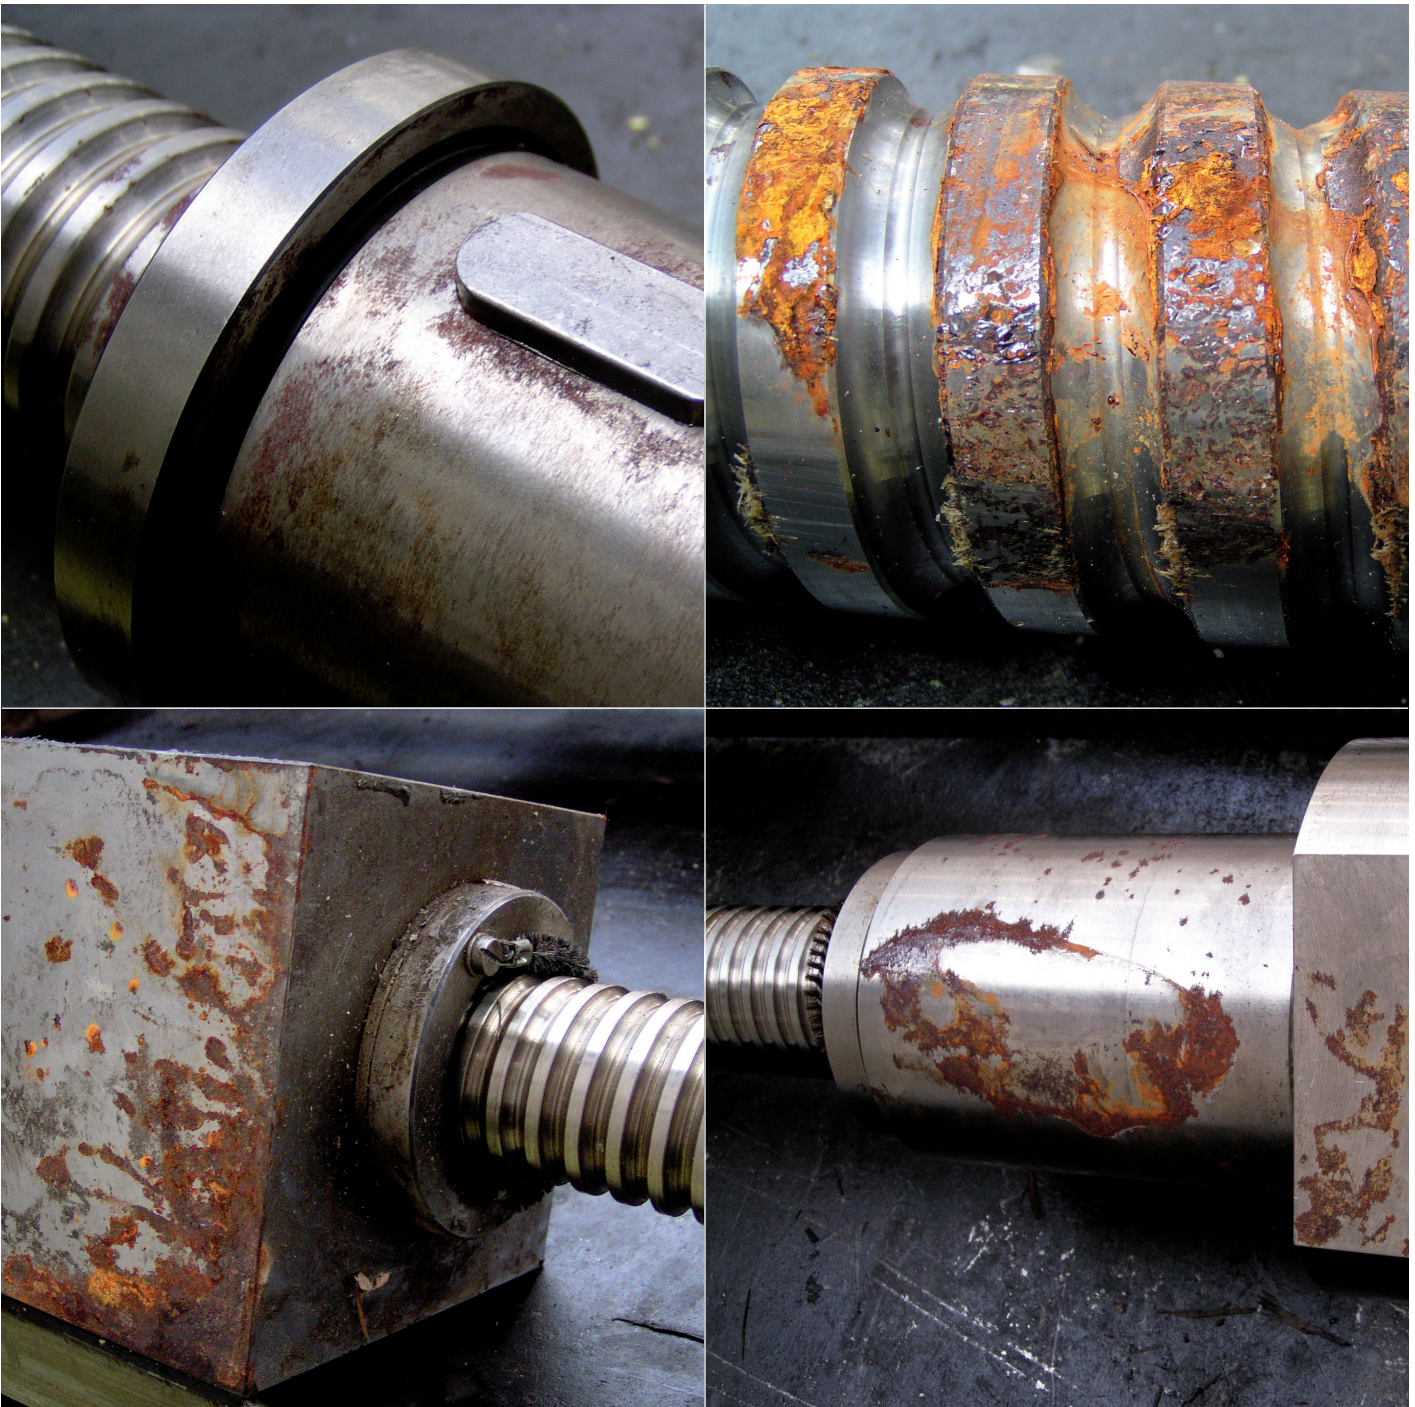

KSK Precise Motion, a.s.
„We always have a solution!“

KSK
PRECISE MOTION

Repairs

The joint-stock company KSK Precise Motion, a.s. offers service of ball screws from in-house production as well as potential emergency repairs of screws by other manufacturers. These repairs are performed preferably on the premises of our company equipped for measurements by special measurement apparatus and for optimum implementation of the repair. In the case of irreparable defects we offer production of new screws made according to the submitted sample.

What we are able to repair

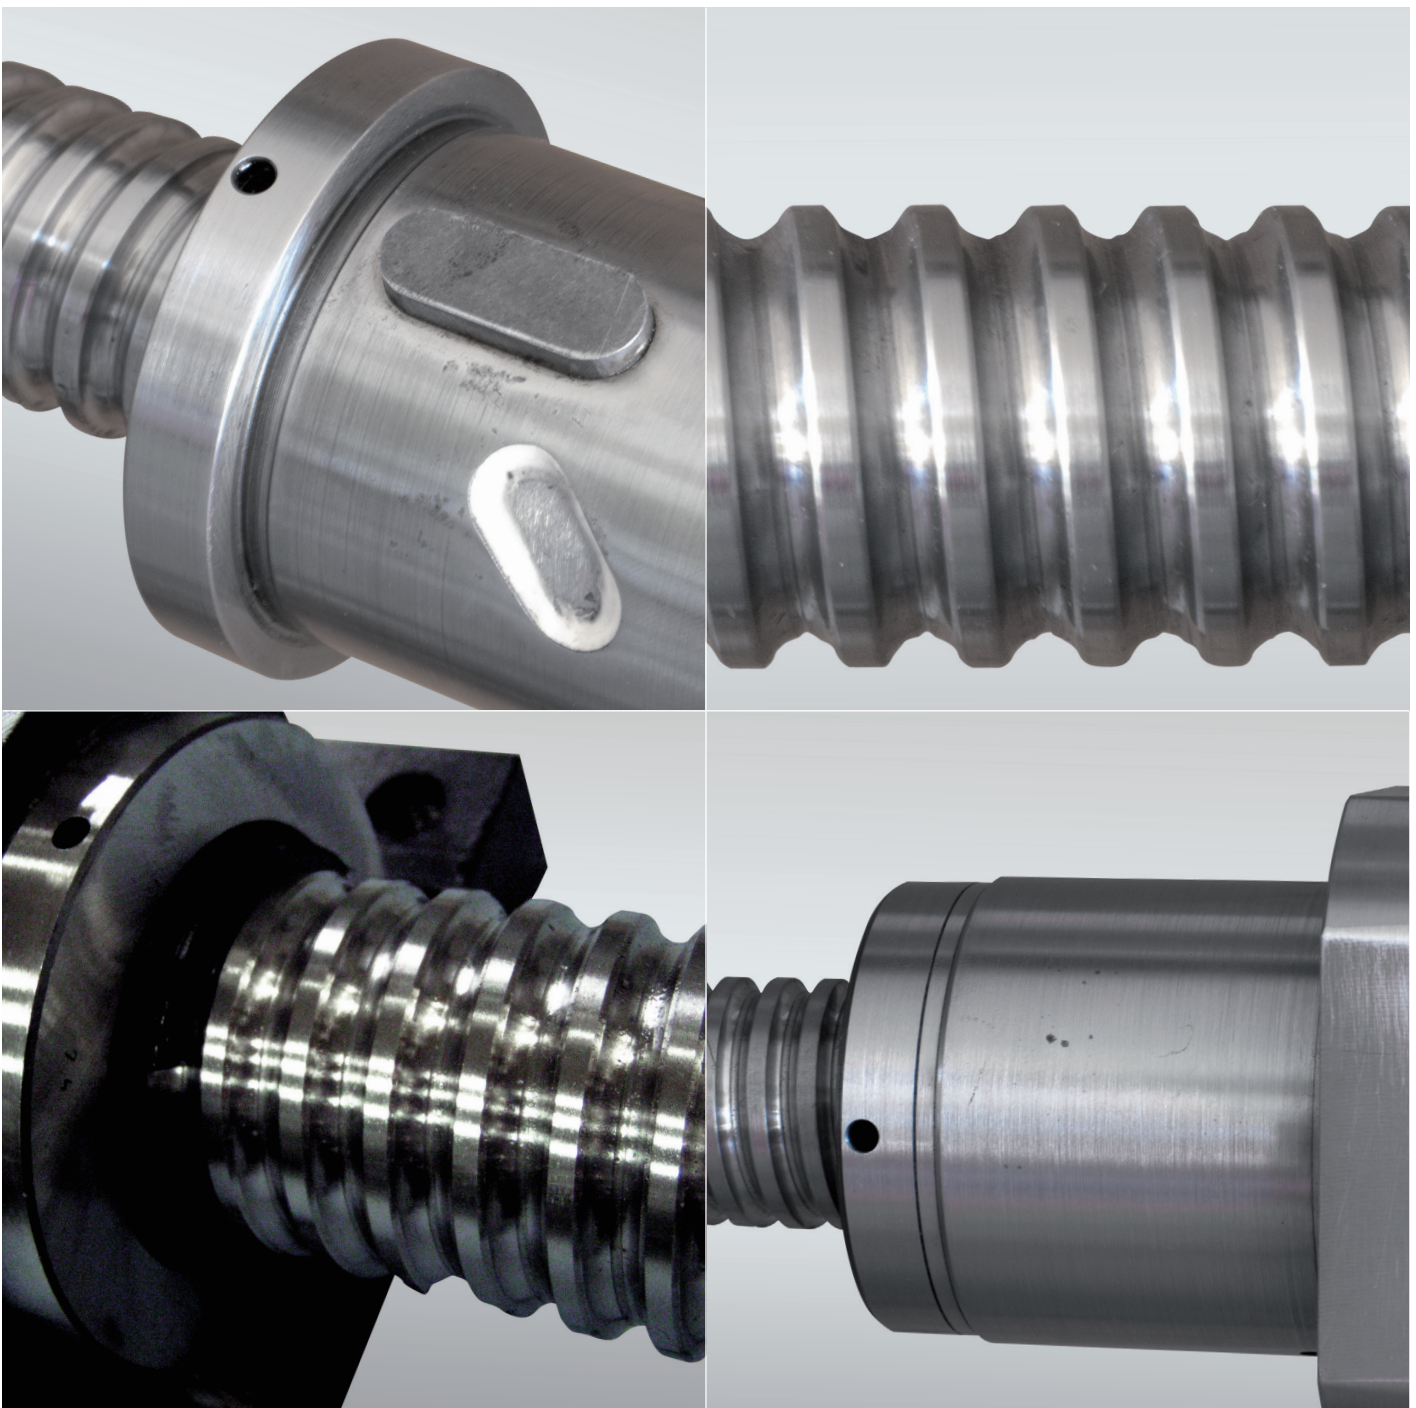

- Repairs of ball and trapezoidal screws from in-house production as well as by other world-class manufacturers
- Assurance of correct functioning and new setting of preloading, or clearances of ball screw nuts
- Production and supply of new products designed and made according to the submitted sample
- Performance of emergency repairs of ball and trapezoidal screws within shortened deadlines according to your need
